## SEAGRASS/EELGRASS RECORDING FORM

About you:

Additional notes on seagrass at this site
(e.g. damage, presence of moorings, litter etc.)

Please return your completed form to:
Seasearch, Marine Conservation Society, Overross House, Ross Park, Ross-on-Wye HR9 7US Or by email to info@seasearch.org.uk

## About your dive: <br> Site name and general location

Position (degrees and decimal minute format if possible)
Lat $\square$

Date
Length of survey (mins)

Approx. U/W visibility (m)

Seabed substrate $\checkmark$

| Sand | Mud | Mixed ground | Other (specify in <br> notes) |
| :--- | :--- | :--- | :--- |

Density of seagrass seen $\checkmark$

| Very dense (seabed <br> obscured) Fairly sparse (seabed <br> visible) Very patchy (only a few <br> clumps or blades |
| :--- |

Estimated average length of blades (cm) $\square$

Sketch the seagrass bed here:

Details of associated species, damage or other notable observations:

|  | What? | Where? | Estimated abundance (where applicable) | Photo(s)? |
| :---: | :---: | :---: | :---: | :---: |
| e.g. | Both flowers and seeds observed | Throughout seagrass bed | Occasional (maybe 20\% of blades?) | $\begin{aligned} & \text { Y \#123.jpg, } \\ & \text { \#345.jpg } \end{aligned}$ |
| e.g. | Exposed roots/rhizomes | Western edge of seagrass bed | Only a couple of plants seemed to be damaged | $\begin{aligned} & Y \\ & (\# 789 . j p g) \end{aligned}$ |
| e.g. | Snakelocks anemone | Attached to blades | $R$ (only one or two seen) | $Y$ |
| e.g. | Drift/unattached seaweed | Wrapped around seagrass | Common (lots of it throughout the whole bed) | $Y$ |
